

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the present application:

1-26. (Canceled).

27. (Currently Amended) A liquid laundry detergent composition comprising

- (a) at least one detergent ingredient selected from the group consisting of anionic surfactants, zwitterionic surfactants, amphoteric surfactants, and mixtures thereof;
- (b) a coacervate phase forming cationic polymer selected from guar gums in an amount of from 0.05% to 0.2% by weight of the composition;
- (c) one or more fabric care ingredients selected from linear cationic silicone block copolymers comprising at least one non-fabric substantive loop loops and at least one fabric substantive hook hooks, wherein the fabric substantive hook is located in the backbone of the linear copolymers;
- (d) one or more enzymes; and
- (e) a liquid carrier.

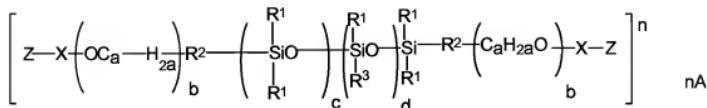

28. (Currently Amended) A liquid laundry detergent composition according to claim Claim 27 wherein the said non-fabric substantive loop loops comprises comprise one or more polysiloxane units.

29. (Currently Amended) A liquid laundry detergent composition according to claim Claim 27 wherein each of the said fabric substantive hooks is free of silicone and each of said fabric substantive hook comprises at least two quaternary nitrogens.

30. (Currently Amended) A liquid laundry detergent composition according to claim Claim 27, wherein the cationic silicone polymer comprises one or more polysiloxane units and one or more quaternary nitrogen moieties in the backbone of the copolymer.

31. (Currently Amended) A liquid laundry detergent composition according to claim Claim 27, wherein the cationic silicone polymer comprises at least 2 or more polysiloxane units and at least 2 or more quaternary nitrogen moieties in the backbone of the copolymer.

32. (Previously presented) A fabric treatment composition according to claim 31 wherein the cationic silicone polymer has the formula:

wherein:

- R^1 is independently selected from the group consisting of C_{1-22} alkyl, C_{2-22} alkenyl, C_{6-22} alkylaryl, aryl, cycloalkyl, and mixtures thereof;
- R^2 is independently selected from the group consisting of divalent organic moieties;
- X is independently selected from the group consisting of ring-opened epoxides;
- R^3 is independently selected from polyether groups having the formula:

wherein M^1 is a divalent hydrocarbon residue; M^2 is independently selected from the group consisting of H, C_{1-22} alkyl, C_{2-22} alkenyl, C_{6-22} alkylaryl, aryl cycloalkyl, C_{1-22} hydroxyalkyl, polyalkyleneoxide, (poly)alkoxy alkyl and mixtures thereof;

- Z is independently selected from the group consisting of monovalent organic moieties comprising at least one quaternized nitrogen atom;
- a is from about 2 to about 4; b is from 0 to about 100; c is from about 1 to about 1000; d is from 0 to about 100; n is the number of positive charges associated with the cationic silicone polymer, which is greater than or equal to about 2; and A is a monovalent anion.

33. (Currently Amended) A liquid laundry detergent comprising according to claim 27 wherein the said one or more enzymes are selected from proteases, amylases, cellulases, mannanase, endoglucanase, lipase and mixtures thereof.

34. (New) A liquid laundry detergent composition according to claim 27 wherein the non-fabric substantive loop comprises one or more polysiloxane units and wherein each of the fabric substantive hooks is free of silicone and comprises at least two quaternary nitrogens.
